

I have d-link vp at home. I want to communicate with people who have their soreson but I must use vp ip to call them. I feel that Sorenson blocks their people from communicating with us who use D-link. Was hoping that Sorenson users have their rights to use VRS providers. They are frustrated with sorenson's limited choice. I urge you to tell Sorenson to stop limiting VP users from their option to use other vrs providers. They expressed their frustrates by waiting more than 20 minutes to use sorenson vrs. Thank you.
